

Photo Instructions For Your DVD Montage

For Weddings

Bride and Groom: Select original photos or digital photos on your computer. Start with baby photos of the Bride growing up, then the Groom and then photos of both of you dating, right through your engagement. Number the photos 1-50 on the back right hand corner in pen. Pick 2 songs for the growing up photos and one song for the dating photos.

For the Parent Dance Chapters: 5-10 photos of Bride and Father alone, and same for Groom and Mother. Please number photos in order.

For Sweet 16s and Bar/Bat Mitzvahs

Select 50 original or digital photos and number them 1-50 from birth through today. Use pen on the back right corner. Pick 2 or 3 songs for the young photos and then for the most recent photos.
